

Chapter 8: Solving Equations

By the end of Chapter Eight, you should be comfortable with the following math concepts. Check off each skill as you complete it!

Section 8.1 Solving equations using one step (including fractions and decimals)

- ✓ I can solve equations using addition.
- ✓ I can solve equations using subtraction.
- ✓ I can solve equations using multiplication.
- ✓ I can solve equations using division.

Section 8.2 Solving equations using two steps (including fractions and decimals)

- ✓ I can rewrite an equation that has fractions (e.g. multiply all the terms by the common denominator)
- ✓ I can solve equations using two steps.

Section 8.3 Solving equations using the distributive property

- ✓ I can solve equations that involve using the distributive property.

Section 8.4 Solving equations with variables on both sides of the equation

- ✓ I can solve equations that have a variable on both sides of the equation by grouping like terms.
